headache that does not completely resolve in 48 hours
- 
cough that does not completely resolve in 24 hours
- 
fatigue that does not completely resolve in 48 hours
- 
sore throat that does not completely resolve in 48 hours
- 
diarrhea & vomiting that does not completely resolve in 48 hours

Stop The Spread

Please follow these steps to decrease the spread of coronavirus.

Physical Distancing

Stay 6 feet away from people outside of your own household

stay home

If you are sick you should stay home until symptoms resolve

Wear a mask

Wearing a mask around people outside your household decreases the risk of spreading illness

Wash your hands

Wash them often with soap and water frequently

Keep sanitizer close

Use it often and tell children and people around you to do the same.

Limit indoor gatherings

Indoor gatherings should be limited to people in your household

Get Tested

If you have illness symptoms you should get tested for covid-19. Stay at least 6 feet away from other people
Dial 211 for your closest testing site.
